TO INSURE SEASONS OF QUALITY FROM YOUR NEW POWER STEERING PUMP PLEASE BE AWARE OF THE FOLLOWING:

- \* USED GEAR BOXES - 90% OF THE TIME THESE BOXES HAVE LARGE DEPOSITS OF SLUDGE, DIRT, METAL SHAVINGS AND WRONG FLUID
- \* THE MINIMUM YOU MUST DO IS DISASSEMBLE THE BOX. CLEAN OUT ALL FLUIDS AND RESIDUE. IF YOU SEE ANY METAL SHAVINGS IN THE OIL OR ANYWHERE ELSE, THE BOX IS PROBABLY WORN OUT AND SHOULD NOT BE USED
- \* **NEVER USE TRANSMISSION FLUID** THIS WILL MOST DEFINITELY CAUSE YOUR PUMP AND GEAR TO FAIL VERY EARLY. USE A GOOD HYDRAULIC FLUID THIS WILL NOT HARM SEAL, FIGHTS CAVITATION AND REDUCES WEAR.
- TO FURTHER PROTECT AND PROLONG THE LIFE OF YOUR PUMP AND GEAR YOU SHOULD USE A POWER STEERING FILTER TO HELP TRAP CONTAMINANTS BEFORE THEY CAUSE DAMAGE.
